Education

Free University of Tbilisi, Bachelor of Business Administration (ESM) 2017 – 2021

- **Relevant coursework:** Programming Methodologies, Web Development (JavaScript), Working with Databases (SQL)

Technologies

Languages: HTML, CSS, JavaScript, TypeScript

Libraries & Frameworks: React, Angular, Next.js, jQuery, Tailwind CSS, Styled-Components, Bootstrap, Material Angular

Backend & Databases: Node.js (Express, Nest.js), MongoDB, Oracle SQL, MySQL, Microsoft SQL Server

APIs & Data Fetching: REST API, GraphQL

Version Control: Git, GitHub

Experience

Junior Angular Developer, Credo Bank September 2024 - Present

- Developed the Credo **Payment Template**, with Apple Pay and Google Pay as part of a **multi-mass enablement** initiative, implementing a newly designed interface for integration into various e-commerce websites and apps
- Built and optimized the **3DS** authentication page to enhance payment security
- Maintained and optimized the **Card Module**, an **internal** Angular platform for managing and processing card transactions by bank staff
 - Successfully upgraded the entire project from **Angular 12 to Angular 19**, ensuring compatibility and implementing modern development practices
 - Enhanced **user interface (UI)** for improved usability and accessibility
 - Streamlined **transaction confirmation notifications** to display aggregated amounts clearly
 - Integrated **Excel file import and export** functionality for efficient data handling and reporting

Personal Projects

Full-Stack Invoice Management Application invoices.vercel.app

- Developed a full-stack application for managing invoices, implementing a **CRUD** backend using Nest.js and MongoDB for efficient data handling. Integrated user authentication with **JWT** and **bcrypt** for secure registration and sign-in. Designed a responsive frontend using **Vite** and **Tailwind CSS**, enhancing user experience.
- Tools Used: Nest.js, Node.js, MongoDB, Mongoose, bcrypt, Vite, Tailwind CSS, JWT, ShadCN, TypeScript

Top 100 movies top100imdb.netlify.app

- Developed a movie application that showcases the top 100 movies based on IMDb ratings, developed using React and RapidAPI. The application includes **user authentication**, state management with **Context API**, **persistent sessions**, and detailed movie pages.

Full-Stack E-Commerce Website e-commerce.netlify.app

- Developed a full-stack **e-commerce** website with user authentication, product management, and order processing. Implemented an **admin** role for product management and integrated **AWS** for image uploads and an **email-sender** for notification system.
- Tools Used: Angular 16, Angular Material, Nest.js, Node.js, MongoDB, bcrypt, JWT, AWS S3, mailer

Languages

Georgian - native

English - full professional proficiency
