PERSONAL PROJECTS

Movie Application

A movie application that showcases the top 100 movies based on IMDb ratings, developed using React and RapidAPI. The application includes **user authentication**, **state management** with **Context API**, **persistent sessions**, and **detailed** movie pages.

To-Do List Application

A to-do list application designed with simplicity and functionality in mind. Users can **add** tasks**, mark** them as **complete, and remove** them when done with **Vite**, **Tailwind** CSS, **Context API**, **LocalStorage**.

E-Commerce Website

An e-commerce website using **GraphQL** for data fetching. Features a Product Listing Page (**PLP**) and a Product Description Page (**PDP**), with a **mini** cart and **cart** system that allows adding, removing, and adjusting product **quantities** and **attributes**. Supports **currency** changes and efficient state management with **Context API**.

Photo Application

A photo application that allows users to explore a vast collection of images sourced from **Unsplash**. Features include a home page displaying 20 popular images, **search** functionality, **infinite scroll**, **data caching** with LocalStorage, a **modal** for detailed views, and a **history page** for past searches.

Movie Application with TMDB API

A movie application that utilizes The Movie Database (**TMDB**) API to fetch and display movie data. Features a search bar for finding movies and a "**Load More**" button for extended browsing, styled with **styled-components**.
